IDENTIFIERS Pacific Islands; *Solomon Islands

ABSTRACT

The Solomon Islands are a scattered Melanesian archipelago in the southwestern Pacific Ocean. There are 21 large islands and numerous smaller ones with a total population of 285,766 in 1986. About two-thirds of school-age children attend organized schools. The literacy rate of the islands was reported at 17 percent in 1980. Approximately 30 percent of the 1,000 primary school teachers are untrained, and another 20 percent have received only minimal training. The National Library contains 22,000 volumes. Most other libraries are located in schools and government departments and are much smaller than the National Library. The bibliography contains 207 items written in English and relating to education and libraries in the Solomon Islands. (JB)

GENERAL INFORMATION:

The Solomon Islands are a scattered Melanesian archipelago covering a land area of 27,556 sq. km. in the southwestern Pacific Ocean, east of Papua New Guinea. The country includes most of the Solomon islands (those top the northwest being part of Papua New Guinea), Ontong Java Island (Lord Howe Atoll), Rennell Islands and the Santa Cruz Islands, about 500 km. to the east. There are 21 large islands and numerous smaller ones. The climate is equatorial, with small seasonal variations governed by trade winds. The population in 1986 was 285,796, currently increasing at 3.4% a year. The Solomon Islands have been independent since 1978 from Great Britain. The capital Honaira is on Guadacanal island Australia has the dominant economic influence.

The Solomons is the least densely populated of the Pacific island states. The Gross National Product is $S 228 million, or $900 per capita, and is expected to increase due to the nation's rich mineral resources and diverse agricultural base of copra, fish, palm oil and timber.

About two-thirds of school-age children attend organized schools, public and church related. The public schools are wholly financed by the central government. There were 462 primary schools in 1987 with 42,374 pupils, and twenty secondary schools with 5,804 students. Provincial Assemblies are responsible for operations of primary and some secondary schools. Six National Secondary Schools have a six-year curriculum. The eleven Provincial Secondary Schools provide three years of study with emphasis on vocational and technical fields. Provincial High School graduates may, upon passing an examination, enter the final three years of the National Secondary schools' programme. The Solomon Islands' literacy rate was reported at 17% in 1980.

The National Secondary Schools run a one-year sixth form to prepare about 60 students for tertiary studies abroad. There were 413 students on overseas scholarships in 1987. About thirty percent of the 1,000 primary school teachers are untrained, and another twenty percent have only received minimal training.

The National Library, formerly the Solomons Islands Public Library, was organized at independence and is funded by Great Britain and Australia. The library contains 22,000 volumes. Libraries are at the College of Higher Education, Kakum

Campus, containing 14,000 volumes; the School of Education and Cultural Studies, Panatina Campus; and the School of Nursing. King George VI secondary school has a library, and small libraries exist at other secondary schools. The University of the South Pacific operates a centre at Honaira, funded by grants from the Australian and New Zealand governments, which has a library of 4,000 volumes. The library of the Ministry of Agriculture is being reorganized and services extended to private companies and individuals. A qualified full-time librarian has been appointed and a bibliography compiled on agriculture and forestry. The British Council conducts a training course for library assistants. The National Library Service provides professional advice and technical assistance for the Law Library, the Parliamentary Library, the Geology and Forestry Library, the National Film Library, and the Medical Library in Honaira.

The Solomons College of Higher Education opened in 1988 a campus at Poitete on Kolombangara Island in the country's Western Province. The Australian government contributed about $1$6,000 to the cost of the new campus which is intended essentially for locals. Australia also gave $U.S. 130,000 to the Ministry of Education and Training in 1988 for extentions to the west wing of the National Museum.
